Background for this correction

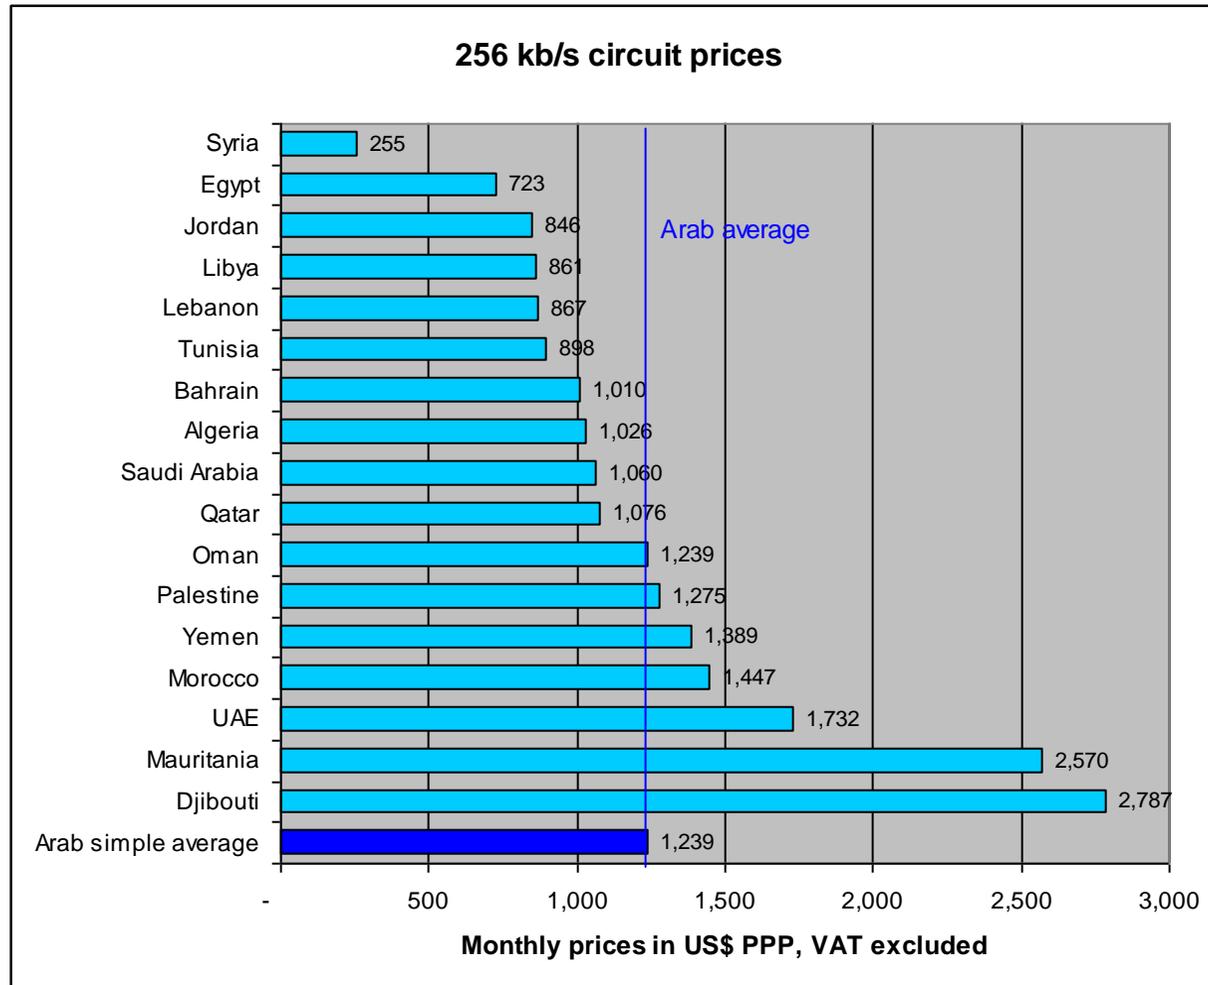

- In the final revisions of the 2010 Arab Price Benchmarking report a problem has been found in the Leased Line data reported in 2009.
 - This problem only affects the 2009 results for Leased Lines.
- The Leased Line price data for the Arab countries for 2009 was shown using Euro (€) exchange rates rather than US\$ as indicated in the report.
 - Except for the obvious problem with the prices shown this also changes the relationships with the OECD reference data that was used in the comparisons.
- This addendum shows the correct Leased Line data for 2009.
 - Prices for Arab countries are increased over earlier indications with a factor of about 1.28 (i.e. the relationship between Euro and US\$ in 2009)
- Timeline comparisons are not affected.
